Storm Causes

Heavy Damage

The storm on Friday night caused considerable damage in this district. The heavy wind which accompanied the rain completely demolished the large lumber shed at the North End Lumber Yard.

Most of the damage, however, occurred west of town. A hail fell on a strip about two miles wide in the Zelia district, doing 100% damage to a number of crops, with lesser amount to a large number of other crops.

The rain that fell amounted to almost a cloudburst, several bridges and even fences being washed out.

At E. Morgan's place in the Hartman district, the hogshed was washed away and about sixty feeder hogs drowned. It is also reported that he lost two head of cattle.

The Springside Girls' softball team got the best of Westdale Girls on Tuesday evening, to the tune of 15 to 6.

Changes Name.

The City Meat Market will now be known as the Didsbury Meat Market. The market will still be under the management of Mr. Jim Kirby, and he adds that they will add considerably to their stock, and are now carrying a full line of fresh, cured and cooked meats.

Farmer Fined.

A case of much interest to the farmers of the district, was brought before Magistrate Philipson Monday when John Keim, who farms land 18 miles east of town, was charged with neglecting to destroy noxious weeds, after receiving notice from the weed inspector.

Defendant pleaded not guilty. Weed Inspector Allgrain stated that he had sent defendant notices and had warned him several times, but he (defendant) had failed to take any action.

Keim was fined \$25.00 and costs and ordered to destroy the weeds.

LOCAL & GENERAL

Mr. Elwood Evans, who has been vacationing at Waterton Lakes, returned to his home here on Friday.

Mrs. H. Peterson spent a few days last week visiting friends in Calgary. She returned home Sunday.

Mr. and Mrs. D. Sinclair attended the Highland Sports in Calgary last Saturday.

Mrs. Gordon Cunliffe, of Nelson, B.C., is visiting with her sister, Mrs. Ed. Kercher.

Miss Cussie Campbell, of Sanny-slope, is spending a few days with Mrs. J. E. Gooder.

Mrs. James Service and son, of Brooks, are visiting with Mr. and Mrs. A. Bruzo.

Miss M. Gardiner, who has been visiting with Miss Dorothy Ranton, returned to her home in Edmonton on Sunday.

Mrs. W. Waycutt, Mrs. W. O. Highland and Mrs. Ervin Rodney visited with Mrs. Eric Nelson last Wednesday.

Mr. St. John, and son, who have been visiting with the former's brother, Mr. Geo. Julien, returned home to Ottawa on Monday.

Mrs. McCloy and Mrs. Gaitness, who motored to Manitoba and spent several weeks there with relatives, returned home last week.

Mrs. W. S. Durrer and daughters Ellen and Lorraine and son, Frank returned from Sylvan Lake on Sunday, where they spent several weeks' vacation.

Mrs. Mary Pyke, of Montreal, and Mr. and Mrs. Allison McNeill, of Calgary, were visitors with Mr. and Mrs. A. C. Fisher last week.

Mrs. Goodhand, who has spent the past year with her daughter, Mrs. Ivan Weber, is spending this week in Calgary. She will leave for Regina next week.

The "Vancouver Province" for its special Rose Festival Edition, selected as a feature story an article written by Mrs. Norman Bowles, of Jutland. The title of the article was "Roses."

Mr. and Mrs. Henry Siebert, of Canada, Kansas, are visiting at the home of Mr. and Mrs. W. E. Rieder and Mr. and Mrs. W. Rupp. Mr. Siebert is a brother to Mrs. Rieder and Mrs. Rupp.

Mr. and Mrs. Whalley, of Armstrong, B. C., who have been visiting Mrs. Whalley's sister, Mrs. M. E. Hughes, left this week to visit another sister at Grenfell, Sask. They were accompanied by Mrs. Hughes.

Mr. and Mrs. H. M. Reiber, Miss Florence Reiber and Mr. Art. Reiber, accompanied by Mr. W. E. Morrow, of Calgary, returned last Monday from a week's motor trip through the mountains.

Fred Evans, George Boyds and Edwin McBae were camping a few days at the Little Red Deer last week. After the storm on Friday night they decided they'd had enough, and started for town on foot the next morning.

Didsbury Loses In Softball Playoff

The Jamieson Point team of Calgary proved too much for the Didsbury boys in the provincial softball playoff games here yesterday.

In the afternoon Schreiner pitched a shutout game for the point boys, who piled up 10 runs against the local boys.

In the evening game, with Luft pitching for Didsbury, a real game was witnessed, when Calgary nosed out the locals by one run. Didsbury piled a 5-run lead in the first two innings, Calgary tying the game in the fifth. The last scores were made in the 8th, when Calgary gathered 2 runs to Didsbury's 1, and won the game 8-7.

Departmental Examination Results.

First Year Grade IX:

The 40th Anniversary of "SALADA" TEA

For 40 years SALADA has given the finest quality in tea. Present prices are the lowest in 15 years.

Lessons Of The Depression

A cabinet minister in one of the prairie provinces has expressed the view that the present business depression in this country is "a blessing in disguise" because it is teaching people many lessons which it is in their own interests and in the interests of the country at large they should learn.

While one can agree that many people are learning some rather hard lessons these days, taught in the school of bitter experience, we are hardly prepared to go so far as to regard such experiences as "blessings," even in a disguised form. The men and women out of work in cities and towns, and the farmers who have suffered complete crop failure year after year, and who have not been able to market such meagre crops as they may have succeeded in raising at a price above the cost of production, and both of which groups have, of necessity, been forced to submit on Government and Municipal relief, and go deeper into debt for that relief, fail to see where the "blessings" come in.

But it cannot be denied that some valuable lessons are being learned, hard and bitter though the experience of learning these lessons may be. And if these lessons are thoroughly learned, taken to heart and not forgotten when the difficult days of the present have passed, then the trials and hardships of the present will not be all loss; there will be some profit in future years.

Quite a few people, for example, have learned to appreciate the value of having a little something in reserve, something laid by for a rainy day, as the old adage puts it, or, perhaps, on the prairies we could more appropriately say, for a dry year. The mistake of spending up to the last dollar of one's income in years when they had incomes has been impressed upon thousands of people, and it is probably safe to predict that, when once again these people are in receipt of incomes in excess of their actual living requirements, they will lay something aside by small instalments from their weekly wages or annual farm operations.

Governments, too, have probably had the lesson enforced upon them that they likewise must accumulate reserves in years of prosperity to tide them and their people through the lean years, rather than, as in the past, embark on large spending programmes when revenues are large and easy to collect. Public debts should be reduced in good years, because they are bound to rise in bad years. When times are generally prosperous, Governments can afford to hold off large programmes of public works and construction, and proceed with them when general employment declines and it is necessary to provide work.

Governments and large industrial employers of labor, it is to be hoped, have also learned to appreciate the fact that they have an obligation towards all the people on the one hand and their own employees on the other, and that the profits accruing to industry in good years must not, in the future, be all distributed in dividends to shareholders, or held in reserve to pay dividends when business drops off, but that an adequate percentage of these profits must be set aside in some form of unemployment insurance in order to provide protection for the workmen who assisted to create those profits. In future labor in industry must be protected just as effectively as the shareholder in industry. Many large concerns realize this, and even welcome it, but it is the duty of Governments to see that it is universally adopted.

Another lesson that is being learned is the wisdom of putting all one's eggs in one basket, to quote another old proverb. In good times many business men have re-invested all their profits in expanding their business far beyond the needs of normal years. They have acted as if "boom" conditions would always prevail, with the result that when business declined they had plants on their hands, with heavy overhead expenses, which it was impossible to carry under depressed business conditions. The same thing can be said of many farmers. When crops were good and prices high, they bought more and yet more land, more machinery, more everything, frequently borrowing large sums to enable them to do these things. With smaller crops and lower prices they found they could not make money, could not pay their debts, while if they had held some of their former profits in reserve instead of tying them all up in so-called fixed assets, which often turned out to be fixed liabilities, they could have carried on without much worry.

Some readers may think we are advocating a lower standard of living. Not at all. The standard of living in this country should mount steadily higher and higher. The difficulty is that we have confined what is essential to a high standard of living and what is not. Some things are essential to such a standard, but many things we have regarded as essential are not; rather they are pure luxuries, and these we should do without until we are well able to afford them. They should never be purchased until some reserve has first been accumulated.

An Interesting Document

Old Trading House Rules For Women In 1613

A document recently brought to Winnipeg, Manitoba, from one of the Hudson's Bay Company, dated back to 1613, shows the following provisions relating to women.

Marriages—Throughout the country, in the absence of clergymen, chief factors only shall solemnize marriages, and no person shall be permitted to take a wife at any establishment without the sanction of the gentleman superintending the district.

Employment for the women and children—In the course of the week, due attention shall be bestowed to furnish the women and children with such regular and useful occupation as is suited to their age and capacities, and best calculated to supplant vicious and promiscuous habits.

Education—As a preparation to education, the women and children at the several posts in the country shall be addressed and instructed to converse in the language (whether French or English) of the father of the family, and that he be encouraged to devote a portion of his leisure time to their instruction as far as his own knowledge and ability will permit.

Personality—A true desire of youth, beauty and rejuvenation, adds a youthful charm to the complexion. Suttens and beautifies the skin. Makes hands finely white. Indispensable to the woman who appreciates subtle distinction. Delightful to use. Delicately fragrant. So luscious and iridescent. Corrects and preserves. A flawless toilet requisite for every discerning woman. A true aid to beauty.

French Take To Air

Private Pilot's Licenses Show Increase This Year

French citizens are talking to the air for their own pleasure in greater numbers, according to the increased number of private pilot's licenses granted by the French government during the year ended March 1932, which totalled 495 as compared with 131 during the same period of last year, states a report from Assistant Trade Commissioner H. C. Schuetts, Paris, France.

The Last Asthma Attack may really be the last one if prompt measures are taken. Dr. J. D. Kellogg's Asthma Remedy will safeguard you. It will penetrate to the smallest bronchial passages and bring about a healthy condition. It always relieves and its continued use often has a permanent effect. Why not try this long-known remedy today and tomorrow. Is use? Inhaled as smoke or vapor it is equally effective.

Son of Charles Dickens

Sir Henry Dickens, K.C., only surviving child of Charles Dickens, the novelist, is retiring from the position of Chief Clerk of the City of London, England, which he has held for 15 years. In this office he sits constantly as a judge at the Old Bailey. Sir Henry, who is 84, is the oldest judge still upon the bench.

It Will Prevent Ulcerated Throat.—At the first symptoms of sore throat, which presages ulceration and inflammation, use a spoonful of Dr. Thomas' Electric Oil. Add a little sugar to it to make it palatable. It will bring the irritation and prevent the ulceration and swelling that are so painful. Those who were periodically subjected to quack remedies thus made themselves immune to attack.

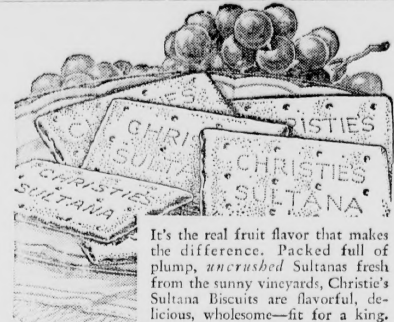

Hatching W.M. Ducks

Nature is being assisted in keeping up the supply of wild ducks for the sportmen of Manitoba. Eight thousand young wild ducks have been hatched in incubators and are now learning to swim in the waters of Lake Winnipeg. Eggs were gathered near the lake and the young birds, although hatched by artificial means, present a healthy appearance. The experiment has been so successful that it is proposed to hatch 30,000 in this way next year.

"What's that?" asked Sandy, pointing to something on Donald's neck. "It's a mole," answered Donald. "Well," said Sandy, "the mole's moving, Donald."

He: "If we were married, darling, the hours would roll by without our noticing them."

She: "Do you mean we probably wouldn't be able to afford a clock?"

It's the real fruit flavor that makes the difference. Packed full of plump, uncrushed Sultanas fresh from the sunny vineyards, Christie's Sultanas Biscuits are flavorful, delicious, wholesome—fit for a king.

Christie's Sultanas

Contribution To Science

Report New Scientific Discovery Made By Curie Family At Paris

Mrs. Marie Curie's family has made a new contribution to science. The discovery of a ray stopped more easily by common paraffin than by lead is reported in Nature, British Journal of pure science.

Irene Curie, daughter of the famous woman scientist, and E. Joliot, the daughter's husband, report the discovery and say this ray is probably a beam of neutrons, almost infinitely tiny (it is hailed as new 'ultimate particles' of matter). The discovery offers light on the possible nature of neutrons.

Canadian Salmon

Canada Leads In Canned Salmon Imports Of Great Britain

Canada in the first six months of 1932 has definitely maintained the leadership in the canned salmon imports of Great Britain, which she captured from the United States a year ago. British trade figures show that in the first six months of 1930, the United States supplied 10,037,264 of the total import of 25,160,072 pounds, and Canada was second with 4,693,200. In 1931 Canada assumed first place with 5,569,544 pounds, and United States was second with 7,140,586. This year Canada sent 8,901,808 and United States 3,977,291.

Miller's Worm Powders, being in demand everywhere, can be got at any chemist's or drug shop at very small cost. They are a reliable remedy for worm troubles and can be fully relied upon to expel worms from the system and abate the sufferings that worms cause. There are many mothers that rejoice that they found available so effective a remedy for the relief of their children.

The Same Name

A woman entered a meat store with a small daughter. Seeing some tripe in the refrigerating case, the little one asked what it was.

"Tripe, dear," replied her mother. "That's funny," said the child. "Daddy says that's what we get over the radio."

Sweet and palatable, Mother Graves' Worm Exterminator is acceptable to children, and it does its work surely and promptly.

Might Try Again

The following correction appeared in a small town paper:

"Our paper carried the notice last week that Mr. John Doe is a defective in the police force. This was a typographical error. Mr. Doe is really a defecator in the police force!"

PERSONAL

SCOTTISH LADY AT PRESENT IN CANADA, would like to take in charge one or more young ladies. Has experience in travel abroad, and with Canadian girls could act as companion to lady, in any part of Canada, or as travel companion. Has excellent testimonials both in Canada and in Britain. Would willingly give more information to interested party.—Apply Box 59, Winnipeg Newspaper Union, 175 McDermot Ave., East, Winnipeg, Man.

Practically His Own Doctor

Prince Of Wales Has Profited By Much Advice

The Prince of Wales has become his own doctor—in a certain extent—according to his own testimony before the British Medical Association.

"I have had no much advice," he told the learned physicians, "and have also learned like many others how to keep myself fit—that I have to some extent become my own doctor. The doctor," he added, "is certainly our first friend in life and our last."

"I've just thrown out all my dust cloths"

—because I've found how to do the work better, easier and quicker.

"I use Appliford Wonder Paper now. You buy it in a neat package that tucks away handsomely in a table drawer. Twenty-five large sheets for a quarter. When you use it, you simply crumple a sheet into a soft wad and go over whatever needs attention."

"I've never seen anything like Wonder Paper. It really dusts, cleans and polishes at the same time. It takes up dirt like magic, and so easily. And you can use both sides."

"Well I used to loathe dust dusting was the bane of keeping the dusts clean. I always used odds and ends of old shirts and the like—and it seemed to me I was eternally washing them. I worried me just to throw them into a bag or cupboard. They seemed so unsanitary."

"The beauty of Wonder Paper is that you throw it away when you're through with it."

"I can promise that you'll like Wonder Paper. It gives you time for things very much more attractive than dusting."

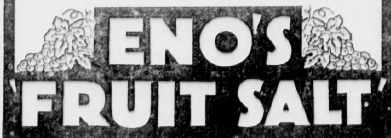

Special Offer

WONDER PAPER is made by the makers of the famous PAPA-SANI Heavy Waxed Paper in the Green Box. Most grocery, hardware and department stores have Appliford Wonder Paper in stock. If yours hasn't, send us the coupon below and we'll give you a booklet entitled "Leflovers", containing one hundred recipes, as a bonus for your trouble.

Appliford Paper Products, Ltd., Hamilton, Ontario.
Enclosed find 25c for which please send me one package of the Wonder Paper and your 100 recipes for "Leflovers".

Keep Health the Eno Way

You do not have to use drastic and strong cathartics that cause irritation. ENO'S "Fruit Salt," by gently and safely ridding the intestinal tract of poisons, will help to make you and keep you healthy. A dash of ENO in a glass of water every morning or night prevents the evils of constipation. Be ENO conscious!

ENO'S FRUIT SALT

Scientific Advances Assist Economic Progress Only When Benefits Are Reciprocal To All

To aid directly in the efficient utilization of Canadian resources to meet Canadian needs, To aid as a nation in extending the bounds of man's knowledge: These are the objects of the National Research Laboratories, established at Ottawa by the Government of Canada.

Science, in the production of man's material needs, effected the industrial revolution. It found wide the limits of goods and services at man's disposal. It made possible the support of populations exceeding populations of the pre-industrial era by hundreds of millions and it offered man today the possibilities of material and cultural advance beyond the dreams of other ages.

A few days ago, a speaker, before a secondary education conference in New York, made the following statement:

"Society is fundamentally different from what it was a few generations ago. Perhaps even as late as two generations ago it was impossible to produce enough for everybody.

The long-term answer as to whether we can afford secondary education necessitates a consideration of the available economic energy in the United States. One hundred and forty years ago approximately 80 per cent of all the people were engaged in agriculture or allied pursuits. In other words, it took 20 per cent of the population to provide the basic food, clothing and shelter for the entire population. Today 20 per cent of the population can provide all of the food, clothing and shelter and leave 80 per cent. to provide cultural services and other types of commodities and services."

Science says, in effect, today:

"What we have some one must produce. Millions living in vast areas of the earth in sub-standard conditions of life even in normal times challenge our production system. If the sum total of goods and services man creates is not sufficient to go around there is under-production. Until every human is a millionaire in English, man recently declared extravagantly, there will not be over-production. The distribution of purchasing power in order that society may take full advantage of its own development and power is society's supreme responsibility. Extreme and un-concerned individualism as Sir Josiah Stamp has suggested, may not be the solution. A world of potential plenty has been wrought from a world of relative scarcity. So quickly has the transformation been effected that the possibilities of the changed circumstances in which man finds himself are yet but dimly appreciated. A fundamental change in the outlook of the common man is involved. There is potential economic energy sufficient to drive poverty from the earth. Thousands can be made available for new and greater tasks as society may direct."

It has been estimated that since the Great War the methods of production used by or available in industry in Great Britain have made it possible for at least a 50 per cent, greater volume of goods to be produced with the same amount of labour. The International Labour Office reports that from 1925 to 1928 output in Germany rose by 16 to 100 per cent. in various industries, while in Austria from 1924 to 1927 there was an increase of from 27 to 78 per cent. In the United States during the period 1918-20 to 1924-26, the average output per worker in the four main branches of industrial activity—agriculture, mining, manufacturing and railways—rose by 27 per cent. In Great Britain according to the same source, the increase in production in a group of ten industries from 1921-1929-30 was 11 per cent, while at the same time the number of workers employed fell by 8 per cent.

The figures indicate the increased productive capacity of modern industrial equipment, contrasting sadly beside the record of millions living in sub-standard conditions of life, and emphasize the necessity of comprehensive action.

The estimate that between 1845 and 1929—the period in which science

made its greatest advances—the number of people in the world to be supported increased from 1,000 million, to 1,600 million, refutes the charge that science has lessened opportunity for employment and if further rebuttal were necessary there stand the records of the gigantic electric industry, built from the findings of Faraday, of the chemical industry, and many others employing millions which owe their present state of advance or their existence to science.

The following statement was made by William Green, the President of the American Federation of Labor, in the New York Times of July 17, 1932:

"During the period of high producing activity—1922 to 1929—the number of unemployed was steadily increasing, because of the rate of technical change. Even at the peak of production the unemployed had mounted to 1,000,000. This was the result of installing improved machinery and new processes without planning for the workers displaced and the consequences to the whole economic structure. Technical improvements became authentic economic progress only when adjustments bring reciprocal profits to all. The progress is in two directions—increasing opportunity for creative work and more legitimate and dependable incomes. Neither group nor nations can make continuous progress unless their gains are shared with others. The poverty of one is a drag upon the prosperity of others. When a company installs a new machine that, with a single operator, does the work of sixty-nine men, what becomes of the sixty-eight? When a glass-bottle machine with one operative turns out as many bottles as fifty hand operatives, what becomes of the forty-nine? A new machine to prepare gold leaf for window signs reduced the payroll of one group from sixty-four to seven.

"In agriculture, machinery made possible an increase of 1,185 per cent. in productivity per worker between 1850 and 1924. This brought a displacement of labour of 50 per cent.

"The printer-telegraph substitutes typist for trained Morse telegraph operators in addition to displacing workers.

"The number of telegraphers and telephone operators controlling railway traffic has steadily declined since 1921, in close correlation with technical changes. Automatic devices and central and remote control of train movements have brought displacement. The decline between 1921 and 1931 for all groups in traffic control was 33 per cent.

"The loss of work opportunities to telephone operators through the dial system is 32.5 per cent.

"Mechanical music in motion-picture houses in Washington, D.C., displaced 60 per cent. of the musicians in white theatres and 91 per cent. in colored. Unemployment among all musicians is now 533 per cent.

"One operative and a ditch-digging machine can do the work that forty-four diggers with hand shovels formerly did.

"This problem of displaced workers is one which single companies or industries cannot solve within their own jurisdiction. It requires too wide a knowledge of economic trends and specific facts. To help meet the needs of business and these displaced persons the Federation has proposed a federal agency accumulating information on man's work by industries, workers available and potential, and the factors that determine productivity and output. Such an agency would perform for wage earners and managements a service in some respects similar to that which the Weather Bureau performs for ships; it would report where high and low in employment are developing, broadcast warnings of danger and spread advice in business planning and organization of the labour market. Such an agency could help to avert a situation like the one that plagues us now."

Antarctica, or the Antarctic continent, is believed to have an area of about 5,000,000 square miles.

BRITISH OLYMPIAN

Here is the baby of the British Olympic team, shown as she had her first glimpse of New York, where she arrived, en route to Los Angeles. She is 16-year-old Mary Keay, one of England's foremost girl swimmers, who hopes to add to her laurels and at the same time help her country at the International games.

Good Fishing In Saskatchewan

Pelhard Lakes and Streams Intrigue the Angler

The fishermen visiting in Saskatchewan will find ample opportunity to fish their favorite red and bass. A good all weather and leads north-west from Prince Albert to Sturgeon Lake (Manitoba Lake), which is one of the noted pelting lakes of the district. It also contains pike, perch and whitefish. Emma Lake, thirty miles north-west of Prince Albert, is well supplied with fish and offers ideal camping locations. It is a beautiful lake with irregular shore line and extensive sandy beaches for bathing. It is surrounded by a heavy stand of trees, including spruce and larch. Sixty miles northwest of Prince Albert is Candle Lake, more difficult to reach, but offering miles of sandy bathing beaches surrounded by heavy spruce, jackpine, larch and poplar, wonderful scenery and an abundance of game fish.

Within His Rights

A Frenchwoman recently had her husband hauled into court because he refused to utter a word of conversation at any meal time. The court decided a man had a right to eat in silent peace if he wanted to.

FRENCH-CANADIAN HANDICRAFTS

French-Canadian handicrafts and products of the loom from all parts of the province were on view when the fourth annual Provincial Handicraft Exhibition, at the Musée Rielieu was officially opened by A. O. Borias, director of the Department of Homecrafts of the Quebec Government. Here is Eva Chaboude, better known to thousands of Canadians as Maria Chaboude, heroine of the French-Canadian classic, with a charming piece of handicraft. Mrs. Chaboude now gives most of her time to improvement of living and working conditions among the women in the rural parts of Quebec.

Rust Resistant Variety of Wheat May Be Available To Farmers Within a Period of Three Years

Rust, the disease of grain, has cost Canada in epidemic years as many as 100,000,000 bushels of wheat.

It has been estimated that the total yield of wheat on the Canadian prairies has been reduced by drought in approximately the same amount.

At the annual meeting of the Associate Committee on Field Crop Diseases in Winnipeg on April 21, it was announced that a rust resistant variety of wheat would be available for distribution to the farmers within two or three years time. The hopes of the Committee may thus be fulfilled just ten years after the attack on the rust menace was co-ordinated and accelerated by the appointment of the Committee. Dr. Robert Newton, the acting director of the Division of Entomology and Agriculture, National Research Laboratories, and Professor of Field Crops and Plant Biochemistry, University of Alberta, has said: "The solution of such a problem in that period of time must be regarded as a scientific triumph of the first order."

Under the aegis of the Associate Committee on Grain Research of the National Research Council a comprehensive programme of investigation into drought resistance is now being embarked upon.

Plans have been made for the work to be done at the University of Alberta and the University of Manitoba. The University of Alberta is following a fourfold programme:

(a) To ascertain the resistance of wheat varieties to drought.

(b) To study in detail certain morphologic and physiologic characters associated with drought resistance.

(c) To study the mode of inheritance and genetics of drought resistance.

(d) To produce desirable strains of wheat resistant to drought. With assistance from the Council the work that has been in progress at the University of Alberta will be expanded. At the University of Manitoba, the Council is making it possible to do for durum wheats what has already been done on such an extended scale in various laboratories for bread wheats. Because of the demand, particularly in Italy where it is used for the manufacture of such aliment-

ary pastes as spaghetti and macaroni, durum wheats have been selling at a premium over the bread wheats. It constitutes a large percentage of the wheat production of Manitoba and is not so susceptible to the most common forms of rust. Its significance in the drought resistance programme of the Associate Committee on Grain Research, is in its suitability for growth in dry climates.

With the recent destructive effects by drought to agriculture in the United States several major projects on drought resistance in field crops have been developed there, but it is probably in Russia that to date the most extensive studies on this problem have been made. The Lenin Academy of Agricultural Sciences has an organization known as the Institute of the Control of Drought, organized for this particular purpose. A special journal devoted to the publication of material on drought, is issued by the Institute. Several new drought resistant varieties, superior in yield as well as in quality to other Russian wheats, have been developed by the plant breeders of that country.

In 1925 the University of Alberta received a number of Russian wheat varieties which were developed for growing in arid soils, a limited precipitation. During the past three years these varieties have proved to be superior to our own common grown varieties in resistance to drought but are very inferior in certain other agronomic characters, especially quality. In 1929 Dr. O. S. Amstutz, Professor of Genetics and Plant Breeding at the University of Alberta, commenced a breeding programme by making nine crosses between the Russian varieties and local strains which are superior in those characteristics in which the Russian varieties are inferior. The hybrid material developed in this way has reached the segregating generations and now an intensive study is about to be begun. Arrangements have been made to conduct the field tests on dry land at Brooks, Alberta. These field tests are made possible through the assistance given for field work by the Canadian Pacific Railway Irrigation Division and the Senate Grain Company. The rest of the work on the project will be conducted at the university where laboratory and greenhouse facilities are available.

An apparatus in which it will be possible to generate artificial "chickens" has been constructed. It is similar to that used by Dr. V. V. Rabar, one of the Russian experts in drought resistance. It consists of a glassed-in chamber connected with a flue to a heating apparatus. Fans for wind blasts and equipment for temperature and humidity control are placed in the flue. Plants to be tested are grown in the greenhouse or in pots in the field in summer, and then moved to the special chambers where various combinations of wind, temperature, humidity and soil moisture can be supplied. The "chicken" winds which have been mentioned are the warm dry winds which at frequent intervals, and without much warning, blow down the passes of the Rocky Mountains on to the prairies, particularly in southern Alberta.

Investigation involving plant breeding and efforts to discover the fundamental nature of drought resistance, as the cereal rust work has indicated, require many years to bring to completion. Dr. Amstutz thinks, however, that desirable progress should be made in the work to produce desirable strains of wheat that are resistant to drought in ten years time. Three years work has already been done on it at the University of Alberta.

Insures Church Collection

A country minister in Australia has insured his Sunday collections against rain. In case of a downpour estimated to interfere with the attendance he will get \$20, and it costs him \$1.50 weekly to carry the policy. It is not known whether prayers for rain were excluded in the bargain.

"Genuine education doesn't always come out of books."

J. E. GOODER, Editor & Manager

No Humble Canadians.

Class Consciousness of Hon. J. H. Thomas, Not Existent Here.

Says the Eastern Chronicle, N.S.:

"When Rt. Hon. J. H. Thomas remarked at Ottawa that the British nation was the only one in which an engine cleaner could rise to cabinet rank, he did not specify whether he meant only the British of the home islands, or was including all the nations of the Commonwealth."

"If he meant the former, we have a Canadian refutation in Hon. Peter Heenan, who began his career as an engine wiper, as the comparable job is called on this side the water, to say nothing of Hon. Gideon Robertson, who was a telegraph messenger originally. Dozens of other examples could be cited, including Hon. C. A. Dunning, who began life as a farm boy, and so on."

"Even if he took the wider meaning of the term 'British,' the Hon. James is still letting his oratorical enthusiasm run away with him, because to go no farther afield from the British Empire than the United States, not dozens, but scores of statesmen will be found, who have risen from simple occupations."

"But when the British minister goes on to talk of his own 'humble' start in life, he reveals a 'caste-consciousness' and speaks a language entirely repugnant to the ideals of labor on this side of the ocean."

"There are no 'humble' Canadian engine cleaners, in fact, no 'humble' workers of any kind."

"On the contrary, in the language of Octavius Roy Cohen, 'anything else but.'"

"Every Canadian considers himself just as good as his next neighbor, whether that neighbor has ten cents or ten millions."

A Fair Break.

As everyone knows, the power which runs a newspaper is advertising. Only through purchased space can a newspaper carry on. Subscriptions barely pay for the blank paper used, and the overhead of producing a paper is carried by the advertisers.

They in turn are business people, and in buying space must feel assured that they are to get value out of that outlay. Every inch of space taken by a local merchant must tell the public something important about his stock. He publishes his prices in the conviction that they deserve public attention and that they should bring him increased trade.

If he is assured that the buying public is reading his message and taking advantage of it, he continues to announce his weekly bargains with a growing conviction that he is actually in touch with a large reading public. As a matter of fact, the merchant who advertises in the weekly paper, reaches not only the town customers but practically every home in a rural area of many square miles. In that area are thousands of prospective buyers, and he uses the paper to get in touch with them. He wants them to know that he is in business and that he is selling at prices worthy of patronage.

The newspapers and the subscribers

LOCAL & GENERAL

Miss Florence Reiber is spending a week at Sylvan Lake, visiting with Mrs. Dan Campbell.

Mrs. Dockstader, who has been visiting with Mrs. L. Levagood and other relatives, left on Monday for her home at Marion, Kansas.

Mr and Mrs N. Bowles and family of Judah, rest at home this week after spending a vacation in the mountains west of Edmonton.

Bob Daniels and Warren William in "Honor of the Family," at the Opera House next Mon. and Thurs. Fascinating, irresistible.

Marilyn Miller in "Her Majesty Love," at the Opera House tonight, (Thursday). You'll be whistling its melodies, repeating its wisecracks. Romance as you'll love it.

Victoria Thomson, L.R.A.M., will be resuming Piano Lessons on Friday September 8th at the home of Mrs. V. A. Gilrie, on the Edmonton trail, across the track. (34)

The Saturday Night Dances at the Opera House are in full swing again. Dance to Bellamy's Music and have a good time. Admission: (34) 30 cents.

The subject of the sermon at Zion Evangelical Church Sunday morning will be "The Stewardship of Prayer." In the evening the pastor will conduct the Monthly Question Box.

Special holiday fares for Labor Day week-end will be the same as those given by the railways for the other long week-ends of summer. Return tickets, good between all stations in Canada, will be sold at the rate of one and one quarter times the first class one way fare, the going portion good from noon Friday, Sept. 2, to noon Monday Sept. 5, and the return portion good until midnight, Sept. 6. The time of the going portions of tickets has been extended to noon Monday this year, instead of to Sunday night, as in previous years.

Fish & Game Assn. Elects Delegates

At a meeting of the Fish & Game Association held Tuesday evening, Geo. Julien and J. E. Cecody were appointed delegates to attend the annual convention at Lethbridge to be held in November.

A number of resolutions were discussed to place before the convention and it was decided to present the following:

"That the Association is opposed to the granting of any lease of land for the purpose of hunting or fishing, to any club or private interests."

"That the special license allowing the shooting of deer during the mountain sheep season, be abolished in all parts of Alberta."

"That the season for the shooting of prairie-chickens be not open for more than six days: 3 days from October 15 and 3 days at the end of October."

It was decided to hold a turkey shoot sometime this fall, and the following committee was appointed to make arrangements: Messrs. Ted Cuffling, F. Jackson, R. Jackson, Carlton Leeson, W. Herbert, W. McFarquhar, J. A. McChes and George Julien.

Music Exam. Results.

The 11 pupils of Victoria Thompson, L.R.A.M., who entered for music examinations in June and July, were all successful. They were as follows:

Royal Schools of Music

Name	Grade	Result
Evelyn Brooke	Advanced	Honors
Arita Scrutton	Higher	Distinct
Lorna Clarke	Theory	Pass
Ona Brown	Lower	Honors
Eva Brown	Lower	Pass
Joyce Brown	Primary	Pass

(Out of 56 pupils in the Higher Grade, only 3 gained distinction—2 boys and Arita Scrutton.)

Toronto Conservatoire:

Joyce Levaogad	Junior	Honors
Vona Bookless	Junior	Honors
Gladys-Rummen	Intro.	Honors
Jack Rummen	Intro.	Honors
Don, Cameron	Primary	Pass

WEEKLY JOKE

"Now," said an English school-master, as he displayed a bright five-shilling piece (a "crown") between the tips of his fingers and thumb, "the first boy or girl that puts a riddle to me that I cannot answer, will receive this as a gift."

"Any more?" he asked, as soon as silence was restored and no one had claimed the coin.

"Yes, sir," sang out a little chap from the further end of the room, "why am I like the Prince of Wales?"

"The Prince of Wales?" said the master very thoughtfully. "Really, Johnny, I see no resemblance. I'll give up."

"Because," cried the boy joyfully, "I'm waiting for the crown!"

Mountain View M.D. Council Meeting

A meeting of the Mountain View Council was held at Olds on Saturday last.

Permission was accepted from Mr. J. Wiebe to use a ford on the Lone Pine, east of 35-31-28 4, and a diversion was ordered.

Arrangements were made for the grading of a half-mile of road with the elevator-grader for the town of Olds.

Plans were approved of several road diversions made during the summer.

A grant of \$50.00 to the Didsbury branch of the Canadian Legion towards the cost of the Memorial erected at the Butte, was approved.

Passing of accounts and approving pay sheets occupied the balance of the meeting.

Here and There

Prender Gordon S. Harrington, of Nova Scotia, has returned from his trip to Europe by the Empress of Britain.

Growth of all crops in western Canada is now vigorous and well advanced for the time of year, according to the latest weekly survey made by the Canadian Pacific Railway's agricultural department, and crop prospects in the West as a whole are encouraging.

Members of the British party touring the Dominion under the auspices of the British Columbian Government, arrived at Montreal aboard the Duchess of Bedford, travelled across Canada by Canadian Pacific rail and lake steamship, stopped over at Banff and will spend between June 15 and July 2 in British Columbia.

Delta Gamma, one of the most important Greek letter organizations on the continent, is holding its annual convention this year at the Empress Hotel, Victoria, June 27-July 1. Stopping over at Banff, a Canadian Pacific special will carry delegates to the Pacific Coast from Chicago, while Canadian members from Montreal, Toronto and Edmonton will join the main group at Victoria.

A Time for - - - Careful Thought

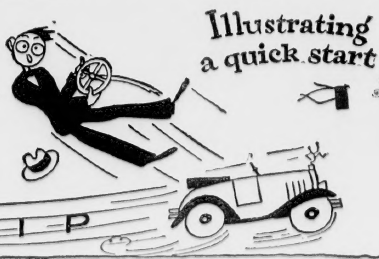

Unless he formulates and follows a new economics, it is only a question of time until the farmer, as a self-respecting freeman, will take his place in the museum of vanished types. In this new economics the principles of co-operative action will play a decisive role.

If the farmer is to cease being the beaten and buffeted victim of modern industrial civilization, if he is to become the master of his own economic and cultural destiny, he must organize, as the rest of economic Canada has organized. If he does not, he will be lost in the shuffle.

The Alberta Pool Elevators represent the foremost step in the co-operative efforts of Alberta farmers. Every Alberta grain grower should see that this Alberta co-operative organization has the greatest possible measure of success.

BACKACHE NOT DUE TO AGE

Many people think that backache is a trouble that comes naturally with advancing years, but this woman of 71 proves that it is not.

"I suffered for a long time from backache," she writes, "but put it down to my age (71). Reading your announcement, I thought I would try Kruschen Salts. I have been taking it for some time and have found great relief. I thought you would like to know it has done me a world of good."

—(Mrs.) E. R.
Pains in the back are the penalty paid for inactive kidneys. Kruschen Salts can be safely trusted to set the matter right. Because Kruschen contains just what Nature needs to persuade your kidneys back into a healthy normal condition. After that, your blood throws off all impurities, there's no more trouble. No more pains. Backache becomes merely a bad memory.

WORLD HAPPENINGS BRIEFLY TOLD

Manitoba's only salt well has started production in commercial quantities.

France has agreed to make no move toward revision of her debt to the United States until conditions are more favorable.

Richard Nichols, licensee of the Centre Hotel, Swansea, who does not let, has travelled 23,500 miles to attend 46 consecutive Derby races.

Mill stones used for grinding wheat 100 years ago will be used again by Albert Miller, who is at present preparing to operate a water mill near Farghan, Ont.

There was a substantial gain in the Prairie Provinces wool clip last year. Alberta clipped 4,574,000 pounds, Saskatchewan 1,600,000 pounds, and Manitoba 1,202,000 pounds. Total 7,376,000 pounds.

President Hoover's fortune has declined from \$4,000,000 in 1914 when he retired from active business, to \$700,000 at the present time, the magazine *Fortune* asserts in its August issue.

The appointment of S. J. Hungerford, acting president of the Canadian National Railways to be a member of the board of directors of the government-owned system is announced.

A giant aeroplane, believed the largest land plane ever constructed, has been completed in the aircraft plant of the Ford Motor Company, Dearborn, Mich. Officials plan a test flight in the immediate future.

Adding to his already large holding of big trees, Frank J. D. Barnum, of Montreal and Annapolis Royal, N.S., has completed the purchase of an additional 218 acres of giant Douglas fir trees on Vancouver Island.

While driving his own automobile, Dr. Hugo Eckener, dirigible expert, tried to pass another motor car and ran into a tree with such force that he knocked it down at Kempten, Germany.

The collection of nineteenth-century British Empire postage stamps gathered by Dr. H. A. James, president of St. John's College, Oxford, England, was sold recently for nearly \$34,000.

Phosphoric for medicinal use is obtained from distillation of bone.

Thousands of MOTHERS ARE GRATEFUL

"... I wish I had known about this when I raised my first baby," so many mothers tell. "Fretful, crying babies make mothers grow old. Our new Baby Welfare book tells how to keep your baby laughing and well—a joy rather than a care. Write today and it will be mailed to you free."

Newspapers Win Prizes

Western Weeklies Receive Awards At Recent Convention

Prizes were awarded to the leading weekly newspapers at the annual convention of the Canadian Weekly Newspaper Association when the Rosewater (Sask.) Eagle, published by C. W. Holmes, was awarded the Charles Clark cup, open to weeklies with circulation over 1,000 and under 2,000. Second prize went to La Chute (Que.) Watchman, and third to the Dufferin Leader, of Carleton Place.

The Hugh Savage shield in the competition for papers under 1,000 circulation was won by the Grand Forks (M.C.) Gazette. A. F. Mason, publisher. There was a tie for second between Alameda (Sask.) Dispatch and Curling, Newfoundland, Star and Times was third, and Elm Plain Miner, Miss Louise Schell, publisher, was fourth.

A special prize for the best front page display donated by J. A. McLaren, of the Barrie Scimitar, was won by the Yorkton (Sask.) Enterprise, published by S. N. Wynn.

MOST HELPFUL LINES ARE EMBODIED IN THIS MODEL FOR THE MATRON

You have only to note its slender pointed cut skirt, long secured hip-line and becoming V-shaped neckline to realize this.

And it's the most comfortable dress to wear. And to make it! The bodice cuts all in one until it joins the skirt. And by the way the gored skirt that gives one such charming height, you'll note is slightly circular toward the hem.

Plain blue linen combines with a blue and white printed crepe linen in this slim-line model.

Style No. 371 is designed for sizes 36, 38, 40, 42, 44, 46 and 48 inches bust. Size 36 requires 3 1/2 yards of 36-inch plain material with 1 1/2 yards of 36-inch figured material.

It is equally attractive carried out in one material with contrasting collar and cuffs.

Price of pattern 25 cents in stamps or coin (cash preferred). Wrap copy carefully.

Police Efficiency

Scotland Yard Has Envious Record For Safeguarding the Public

The comparative immunity from serious crime enjoyed by the largest city in the world is not due to accident but to impartial enforcement of the law and police efficiency. Scotland Yard is synonymous with the successful pursuit of criminals and this world-wide reputation is vigorously safeguarded by taking full advantage of the latest scientific inventions.

The latest aid to crime detection in the metropolis is the installation of the most perfect radio network in the world. When it comes into operation on an early date, every district of the 700 square miles under metropolitan police supervision will be able instantly to communicate with Scotland Yard Headquarters. Police tenders are to be provided with transmission sets and these will work on secret wave lengths, of which type have been reserved for police use. The same wave length can be used by several local authorities.

It is announced that under the new system the chances of anyone picking up a police message are much reduced. The police have the advantage that no one knows when their messages are going to be sent out and in addition a secret code is used. It is stated that in the near future every policeman on his beat will be equipped with radio. He will carry a miniature set in his helmet. Another new device just installed in London is an improvement in police telephone boxes. The opening of the box door acquaints the nearest police station that someone is inside. The caller hears a voice through a grille and gives his message without having to use any instrument. —Calgary Herald.

Australian Trees For Canada

Send Gift of 18,000 Seeds Of Rare Trees and Shrubs

From the capital of another British Dominion—Canberra, in Australia—there has come to Canada a gift of 18,000 seeds of rare Australian trees and shrubs. There are 18 varieties and a thousand seeds of each variety have been presented to Canada as a gift from the Australian Government. The main varieties are eucalyptus, acacia and casuarina. They will be planted under the direction of the Canadian Department of Agriculture. The presentation is in the nature of a reciprocal gesture. Canadian trees and shrubs have already been planted at Canberra and have taken so well that there seems no reason to doubt the Australian plants will do equally well in Canada.

Stagecoach Still Running

Makes Regular Trips Between Piccadilly and Hampton Court

Every day during the summer—except on Sundays—a stagecoach is travelling between Piccadilly, London, and Hampton Court. This is the Greyhound, which is said to be the last stagecoach in the world to make a regular daily run. It might be thought that nowadays, when there are so many faster modes of travelling, it would be difficult to make a stagecoach pay. But there are keen amateur drivers who appreciate being able to drive four-in-hand on one day each week, and are willing to pay for the privilege. And members of the general public get a real thrill out of a stagecoach journey.

Study Terrestrial Magnetism

Well-Equipped Expedition To North Will Investigate Polar Disturbances

The observations being carried out by the "Million Dollar Expedition" which will be stationed at Chesterfield Inlet this winter will be of great importance to Hudson Bay shipping. It was learned from members of the party who arrived at Churchill, those who will go north are Frank I. Davies, M.Sc., McGill University, in charge of the party; S. T. McVeigh, B.Sc., research assistant, chemical engineer, Queen's University, Kingston; Dr. B. W. Currie, University of Saskatchewan, physicist; John P. Ren, observer and cook.

Chesterfield Inlet is situated within the realm of the most violent magnetic disturbance, which often render ordinary compasses valueless at times, and which have proved one of the arguments against the success of Hudson Bay as a shipping route.

The party has the most elaborate equipment ever brought into the north for the study of terrestrial magnetism, earth currents, aurora and meteorological and upper air work.

It is expected that their studies will make a definite contribution to the relief of problems of navigators within the magnetic disturbance zone.

Recipes For This Week

(By Betty Barclay)

ORANGE FILLING

(Sufficient for 1 two-layer cake)

1 egg.
6 tablespoons sugar.
2 1/2 tablespoons cornstarch.
1/2 cup water.
1/2 cup orange juice.
1/2 teaspoon grated orange rind.
1 tablespoon butter.
Beat egg, add sugar and cornstarch. Mix well. Add water, juice and rind. Cook in double boiler 15 minutes, stirring frequently. Add butter. Cool before spreading on cake.

Orange Date Filling

(Sufficient for 1 two-layer cake)
Add 1/2 cup chopped dates to Orange Filling.

Orange Marshmallow Filling

(Sufficient for 1 two-layer cake)
Make Orange Filling, adding to it 8 marshmallows which have been quartered.

PARTY PUNCH

1 pint tea infusion.
1 pint cold water.
2 cups sugar.
2 cups crushed pineapple.
1 cup orange juice.
1/2 cup lemon juice.
1/2 cup strawberry syrup.
Mix all the ingredients and stir until the sugar is dissolved. Dilute with crushed ice. Serve in tall glasses garnished with thin slices of lemon and maraschino cherries.

Aviators Had Trying Time

Blown Off Course German Flyers Lost For Two Months

Two months ago Capt. Hans Bertram, 27, and Mechanic Adolph Klusmann took off from Keopang, Timor Island, for Darwin, Australia, 500 miles south. In their Junkers seaplane "Atlantis" they had left Germany three months prior, on a tour to boost German trade. From Keopang they never reached Darwin. For weeks flyers and foot parties searched the bush of Australia's north coast. Some back natives found the abandoned plane and Capt. Bertram's cigarette case and a hummerchief, on the beach near Drysdale Mission, 160 miles northwest of Wyndham. Australian officials continued searching, dubiously. At last, one day a police hunch brought Bertram and Klusmann ashore at Wyndham, nearly defenceless by suffering. Blown off their course in the night, the flyers had landed near Drysdale, thinking it was Melville Island. They had a few biscuits, no water. For days they tramped the bush in search of water and friendly natives, and later drank the contents of the plane's radiator. On several occasions they plodded miles to what they thought was a signal fire, arrived exhausted to find an unattended bush fire. They "caught lizards on the rocks which we ate ravenously." They fashioned a raft from one of their seaplane floats, paddled for five days in a rough sea, saw a steamer pass within a mile of them. Hunger drove them again ashore, to feed on shells and leaves. On the 35th day "to our great excitement we sighted a black, who brought a large fish, which we cooked and ate ravenously. We knelt and offered prayers to the good God for our deliverance."

In Remscheid, Prussia, Capt. Bertram's home, his grandmother had turned grey, his grandmother had died of grief.

Machine Makes Rain

For Russian Farmers

Tests Of Device Said To Have Proved Satisfactory

An artificial rainmaker termed at Leningrad, the first in the world, has been produced by the special institute for artificial rain.

The rain making machine develops current at 75,000 volts and preliminary tests are stated to have proved highly satisfactory.

A second apparatus, with a capacity of 200,000 has been put into construction. This larger machine is expected to produce even more startling deluges.

It is understood that this apparatus and others which the institute plans to construct will eventually be installed in central Asia and in sections of the Volga region where a scant natural rainfall often harms crops.

When resting, a mosquito raises its hind legs.

All Her Children Were Troubled With Diarrhoea

Mrs. J. J. Bickert, R.R. 1, Enderby, B.C., writes:—

"Last Summer all my children were troubled with diarrhoea, and were so bad I did not know what to do. A friend told me to give them Dr. Fowler's Extract of Wild Strawberry, so I got a bottle, and after a couple of doses you should have seen the change. The children were soon well again, and I am very thankful to your wonderful remedy. I find it the only one that relieves so easily and quickly."

"WHY LOOK YOUR AGE?"

asks Billie Burke

"I really am 39," says this famous star. "And I don't see why any woman should look her age."

"We on the stage must keep our youthful freshness. To do this through the years means, above everything, guarding complexion beauty. For years I have used Lux Toilet Soap regularly—it keeps my skin amazingly clear and soft."

Years ago Broadway stars eagerly adopted Hollywood's favourite beauty care—Lux Toilet Soap. Actually 98% of the lovely complexions you see on the screen are cared for by this fragrant white soap that costs only 10¢!

"I'm 39"

THE HOUSE OF DREAMS-COME-TRUE

— BY —

MARGARET PEDLER

"The Splendid Fable of 'The Hermit of Far Peak'"

Frederick & Son, Ltd., London.

No one, including Jean as the accompanied Burle to the kitchen premises and assisted him in the preparation of their supper, would have imagined that she was acting her part in any other capacity than that of a willing playmate. She was wise enough not to exhibit any desire to leave him alone during the process of carrying the requisites for the meal from the kitchen into the living-room. She had noticed the sudden mist in his watchful eyes and the way in which he had instantly followed her when, at the commencement of the proceedings, she had unthinkingly started off down the passage from the kitchen, carrying a small tray of table silver in her hand, and thereafter she refrained from giving him the slightest ground for suspicion. Together they cooked the chops, together laid the table, and finally sat down to share the appetizing results of their united efforts.

Throughout the little meal Jean preserved an attitude of detached friendliness, laughing at any small joke that cropped up in the course of conversation and responding gaily enough to Burke's efforts to entertain her. Now and again, as though unconsciously, she would fall into a brief reverie, apparently preoccupied with the choice that lay before her, and at these moments Burke would refrain from distracting her attention, but would watch intently, with those burning eyes of his, the charming face and sensitive mouth touched to a sudden new seriousness that appeared.

By the time the meal had drawn to an end his earlier suspicions had

been lulled into tranquillity and over the making of the coffee he became once more the big, overgrown school-boy and jolly comrade of his less tempestuous moments. It almost seemed as though, to please her, to atone in a measure for the mental suffering he had thrust on her, he was endeavouring to keep the volucrant lover in the background and show her only that side of himself which would serve to reassure her.

"I rather fancy myself at coffee-making," he told her, as he deviously manipulated the little coffee machine. "There"—purring away his brimming cups—"taste that, and then tell me if it isn't the best cup of coffee you ever met."

Jean sipped it obediently, then made a wry face.

"Ough!" she ejaculated in disgust. "You've forgotten the sugar!"

As she had herself sipped the sugar-basin cut of sight when he was collecting the necessary coffee paraphernalia on a tray, the oversight was not surprising.

It was a simple little ruse. Its very simplicity its passport to success. The naturalness of it—Jean's small, screwed-up face of disgust and the hasty way in which she set her cup down after tasting its contents—might have thrown the most suspicious of mortals momentarily off his guard.

"By Jove, so I have!" instinctively Burke sprang up to rectify the omission. "I never take it myself, so I forgot all about it. I'll get you some in a second."

He was gone, and before he was half-way down the passage leading to the kitchen, Jean, moving silently and swiftly as a shadow, was at the doors of the long French window, her fingers fumbling for the catch.

A draught of cold, mist-laden air rushed into the room, while a slender form stood poised for a brief instant on the threshold, silhouetted against the white curtain of fog. Then followed a hurried rush of flying footsteps, a flitting shadow cleaving the thick pall of vapour, and a moment later the wreaths of pearly mist came flitting unhindered into an empty room.

Blindly Jean plunged through the dense mist that hung outside, her feet sinking into the sodden earth as she fell across the wet grass. She had no idea where the gate might be, but sped desperately onwards till she rushed full tilt into the bank of mud and stones which fenced the bungalow against the moor. The sudden impact nearly knocked all the breath out of her body, but she dared not pause. She trusted that his search for the hidden sugar-basin might delay Burke long enough to give her a few minutes' start, but she knew very well that he might chance upon it at any moment, and then, discovering her flight, come in pursuit.

Clawing wildly at the bank with hands and feet, slipping, sliding, bruised by sharp-angled stones and pricked by some unseen bushy growth of gorse, she scrambled over the bank and came sliding down upon her hands and knees into the hedge-trough dug up to its further side. And even as she picked herself up, shaken and gasping for breath, she heard a cry from the bungalow, and then the sound of running steps and Burke's voice calling her by name.

"Jean! Jean! you little fool! . . . Come back! Come back!" She heard him pause to listen for her whereabouts. Then he shouted again. "Come back! You'll hurt yourself! Jean! Jean!"

But she made no answer. Dismayed by fear lest he should overtake her, she raced recklessly ahead into the fog, heedless of the fact that she could not see a yard in front of her—even blind of it, knowing that the mist hung like a shielding curtain between her and her pursuer.

The strange silence of the mist-laden atmosphere hemmed her round like the silence of a tomb, broken only by the sucking sound of the oozy turf as it pulled at her feet, clogging her steps. Lance-sharp spikes of gorse stabbed at her ankles as she trod it underfoot, and the permeating moisture in the air soaked swiftly through her thin summer frock till it clung about her like a winding-sheet.

Her breath was coming in sobbing gasps of stress and terror, her heart pounded in her breast; her limbs, impeded by her clinging skirts, felt as though they were weighted down with lead.

Stop and Think!

it pays to "ROLL YOUR OWN" with

TURRET FINE CUT Cigarette Tobacco

It pays in pleasure—and pays in actual cash. For Turret Fine Cut is fragrant, mellow Virginia tobacco, that rolls into thoroughly satisfying cigarettes. You can roll at least 50 cigarettes with a 20c package.

FREE Chantecler cigarette papers with every package.

15¢ and 20¢ packages—also in 1/2 lb. vacuum tins

Then, all at once, seeming close at hand in the misleading fog which plays odd tricks with sound as well as sight, she heard Burke's voice, cursing as he ran.

With the instinct of a hunted thing she swerved sharply, stumbled, and lurched forward in a vain effort to regain her balance. Then it seemed as though the ground were suddenly cut from under her feet, and she fell . . . down, down through the mist, with a scattering of crumbling earth and rubble, and lay, at last, a dazed, unconscious heap in the deep-cut track that lined the moor road to the bungalow.

CHAPTER XXVIII.

They Who Waited

Lady Anne sat gazing absently into the heart of the fire, watching the restless leap of the flames and the little scattered handfuls of sparks, like golden star dust, tossed upward into the dark hollow of the chimney by the blazing logs. The "warm and sunny south"—at least, that part of it within a twelve-mile radius of Dartmoor—is quite capable, on occasion, of bellying its guide-book designation, particularly towards the latter end of summer, and there was a raw dampness in the atmosphere this evening which made welcome company of a fire.

It seemed a little lonely without Jean's cheery presence, and Lady Anne, conscious of a craving for human companionship, glanced impatiently at the clock. Blaise should surely have returned by now from his all-day conference with the estate agent.

She had not much longer to wait. The quick hoof-beats of a trotting horse sounded on the drive outside, and a few minutes later the door of

the room was thrown open and Blaise himself strode in.

"Well, madonna?" He stooped and kissed her. "Been a lonely lady today without all your children?"

She smiled up at him.

"Just a little," she acknowledged. "When I came back from those stupid committees, which are merely an occasion for half the old tabbies in the village to indulge in a squabble with the other half, I couldn't help feeling it would have been nice to find Jean here to laugh over them with me. Jean's sense of humour is refreshing; it never lets one down. However, I suppose she's enjoying her beloved Moor by moonlight, so I mustn't grumble."

Blaise shook his head. "Much moonlight they'll see!" he observed. "I rode through a thick mist coming back from Hedge Barton. It'll be a blanket fog on Dartmoor tonight."

"Oh, poor Jean! She'll be so disappointed." Blaise sat down on the opposite side of the hearth and lit a cigarette. The dancing firelight flickered across his face. He was thinner at last, his mother thought with a quick pang. The lines of the well-beloved face had deepened; it had a worn—almost ascetic—look, like that of a man who is constantly contending against something.

Lady Anne looked across at him almost beseechingly.

"Don't," she said, "have you quite made up your mind to let happiness pass you by?"

He started, roused out of the reverie into which he had fallen.

"I don't think I've got any say in the matter," he replied quietly. "I've forfeited my rights in that respect. You know that."

"And Jean? Are you going to make her forfeit her rights, too?" "She'll find happiness somehow—elsewhere. It would be a very short-lived affair with me"—bitterly. "After what has happened, it's evident I'm not to be trusted with a woman's happiness."

There were sounds of arrival in the hall. Nick's voice could be heard issuing instructions about the hostess of his fishing tackle. Lady Anne spoke quickly.

"I don't think so, Blaise. Not with the happiness of the woman you love," she said, her hand on his shoulder.

der as she passed him on her way into the hall to welcome the wanderer returned. "Tell Jean," she advised, "and see what she says. I think you'll find she'll be willing to risk it."

When she had left the room Blaise remained staring impassively into the fire. His expression gave no indication as to whether or not Lady Anne's advice had stirred him to any fresh impulse of decision, and when, presently, his mother and Nick entered the room together, he addressed the latter as casually as though no emotional depths had been stirred by the recent conversation.

"Hello, Nick! Had good sport?" "Only so-so. We had a jolly time, though—out at Itterbury Bridge. But I had the sense of a business getting back from Exeter this evening. It was so misty in places we could hardly see to drive the car."

Blaise nodded. "Yes, I know. I found the same. It's a surprising change in the weather."

"Poor Jean will have had a disappointing trip to Dartmoor," put in Lady Anne. "The mist is certain to be bad up there."

"Dartmoor? But she didn't go—surely?" And Nick glanced from one to the other questioning.

(To Be Continued.)

Douglas' Egyptian Liniment is remarkable in its quick, effective action. Relieves instantly burns, sprains, toothache and neuralgia. Invaluable for sore throat, cold and croup.

Queen Victoria's favorite apple, the yellow Newton, is probably the best liked apple in England today.

Artificial tea is not new. It was industrially used as far back as 1850.

Complete Organization!

United Grain Growers operate 450 Elevators in Western Canada. Great terminal elevators are operated at Port Arthur and Vancouver. Export offices are maintained at Vancouver and New York.

The complete organization of this company, its highly trained staff, its constant contact with all the markets where Canadian grain is sold and its financial strength, all contribute to its ability to give good service to western farmers in handling their business.

Deliver Your Grain to

UNITED GRAIN GROWERS LTD.

ELEVATORS AT DIDSBURY and ALLINGHAM

Mountain View Notes

The next meeting of the W.I. will be held at the home of Mrs. W. J. McCoy, of Didsbury.

Several of the farmers have commenced cutting grain, but their plans were frustrated owing to inclement weather over the week-end.

Mr. and Mrs. H. Roberts spent a few days in Calgary recently, and enjoyed some fishing on Cheatem Lake, where the fishing is reported to be good this season.

Lester Barnes, son of Mr. and Mrs. Ellis Barnes, suffered painful burns as the result of an accident, and was taken to the Didsbury Hospital. All wish him a speedy recovery.

Burnside Notes.

Mrs. Kilson, of Calgary spent the week-end with Miss Alberta Metz.

Mrs. C. L. Cipperey has returned from a ten days' visit with her daughter Dorothy at Banff.

Mrs. A. E. Thompson Junior and son Donald have been spending a week at her old home.

Mrs. Bert Pross and daughter Marjorie spent Tuesday evening with Mrs. Noah Eckel.

Mr. and Mrs. Albert Arlenson are expected back the first of the week from their honeymoon trip.

Mr. Bob Springgay, of Sweetwater, B.C., is assisting Mr. George Metz for a month.

Master Lewis Spraggs left Thursday for Hythe, Alberta where he will visit his brothers Bob and Pat and also attend High School.

Melvin Notes

Dance at A. Krebs' barn tomorrow (Friday). Calgary orchestra.

How about a Ford service station in the Hartman district, Fritz?

Mrs. Chas. Young, Dorothy, and Mrs. Geo. Young spent Thursday at Mrs. Duncan's.

Mrs. J. Good and daughter, of Garfield, spent the week with her sister, Mrs. Peter Johnston.

Mr. and Mrs. Orde and Donald Phillips spent Sunday with Mr. and Mrs. John Clarke.

Mrs. F. W. Leeson entertained the Mayle girls and Mrs. Geo. Young at tea on Wednesday.

Mrs. Carlson and Gladys returned home on Sunday after a week at Sylvan Lake.

A new barn at the Melvin school is sure an improvement to the school year.

We understand that the wedding bells have rung for a member of the Melvin district. Charivariers have been there, for a gatepost is missing. The Rand's ranch will be operated by these newweds in the coming year.

Local news of your town and district makes the weekly newspaper interesting. If you have visitors or have been visiting, know of any interesting event of social, lodge, club or general nature, phone The Pioneer, No. 12.

Cards of Thanks

We wish to thank the people of Didsbury, and our many friends for their kind sympathy and help during our recent bereavement. Also for the many floral tributes.

H. W. CHAMBERS
AND DAUGHTERS

We wish to thank our many friends, Dr. Clarke and the Hospital staff for their kindness and help during our recent bereavement.

MRS. CHAMBERLIN
AND FLORENCE.

Mr. and Mrs. Duncan Lamont wish to express their thanks to the matron and nurses of the Calgary Junior Red Cross Hospital, and to Didsbury friends and neighbors for their kindness and sympathy during the sickness and death of their son, Neil.

Obituary.

Mrs. H. W. CHAMBERS.

The funeral services for Mrs. H. W. Chambers were held at the residence on Thursday afternoon, August 18, when Rev. A. J. Mitchell conducted the service. After the service the remains were taken to Calgary and from there to Embro, Ont., where interment took place.

The following acted as pallbearers: Messrs. R. Barrett, W. D. Spence, J. McDougall, J. Robertson, W. Morton, W. A. Austin.

Mrs. Chambers was born at Embro, Ont. on January 31st, 1879, and died at her home in Didsbury, Alberta on August 16th, 1932. She was married to Mr. Chambers four years ago and resided in Didsbury since that time. During her life here she took a great interest in church work; was an active worker in the L.O.D.E. and a member of the Eastern Star. She had gathered a large number of friends, who regret deeply her loss.

Besides her husband and two step-daughters, the following relatives survive to mourn her loss: Mrs. Jessie Sutherland, Embro; Mrs. Annie Malcolm, Toronto; Miss Isabel Mackay, Winnipeg, and Messrs. Neil Mackay, Okotoks, Alberta, and A. J. Mackay and Ian Mackay, Embro, Ont.

We join with the whole community in offering our sympathy to Mr. Chambers and family in their great loss.

NEIL ALEXANDER LAMONT.

The funeral service for Neil Alexander, son of Mr. and Mrs. Duncan Lamont, was held in the United Church on Saturday, August 20th, 1932. Rev. A. J. Mitchell conducted the service.

The deceased youth, who was 17 years of age, was born at Red Deer. At the age of 3 years he was stricken with infantile paralysis. He received treatment in Winnipeg, and for the last four years had been in the Junior Red Cross Hospital at Calgary, where he passed away on Wednesday, August 17th.

He is survived by his father and mother, five brothers and one sister.

Here and There

Lord Nigel Douglas-Hamilton, in charge of a party of thirty English Public School boys, who will arrive in Montreal August 5, under his supervision, claims that there is no better "finishing school" than a tour of this nature.

First wheat harvesting reports in the Canadian West were reported by the agricultural department of the Canadian Pacific Railway from Winnipeg, July 23, with barley and rye going under the knife in the Alda and Eaten sub-divisions of the railway. The wheat was harvested in southern Manitoba.

August will see the season in the Canadian Rockies at its peak with the Prince of Wales Trophy, already bringing in golf entries from far and near, scheduled for August 12-20 and coinciding with this event the Indian Days' celebration, August 13-21, which will be attended by Stoney, Cree and Kootenays.

Conducting five French and five Swiss professional men from Paris, France, to this continent, Nicolas Racz, of the Paris office of the Canadian Pacific Railway, is en route to Niagara Falls, Detroit, Chicago, Washington, New York, Albany, Montreal, Quebec, and returning to Europe on the Empress of Britain, August 6.

Mystery cruises, so popular out of New York, Southampton and other great ports, were entered in on the British Columbia coast with the sailing of the coastal liner Prince Patricia, of the Canadian Pacific coastal service, to an unknown destination under sealed orders, recently. Close to 200 passengers were attracted by the trip.

Julius, red, succulent buffalo steaks grilled to a nicety, greeted the Australian and New Zealand delegates to the Ottawa Imperial Conference as they entered the dining car of their special train over the Canadian Pacific Railway out of Vancouver recently. The Aussies were particularly impressed by this menu and pronounced it better than any beef they had ever eaten.

Governor Franklin Delano Roosevelt of New York, Democratic Nominee for the Presidency, has for years been one of New Brunswick's most distinguished non-resident visitors, members of his family annually spending several weeks at the Houscott summer home at Campobello, one of the Grand Manan Island Group in Passamaquoddy Bay. He first came there as a mere lad back in 1895.

Answering the call of Mt. Assiniboine, Matherons of the Canadian Rockies old and new members of the Trail Riders' Association, gathered at Banff July 25th with the objective of clearing the long ascent to the roof of the world and the Alpine country of the Great Divide in the vicinity of the Mountain. The ride required five days in all. Twenty American girls, summering at the Lake Windermere ranch, were among those taking part. (860)
